

How Do I Get Rid of This?

A VISUAL GUIDE TO SORTING WASTE

#1 plastics, including water and soda bottles with lids, peanut butter jars, mouth-wash bottles (rinse first!)

#2 plastics, including rinsed milk jugs, shampoo bottles, detergent and bleach bottles

#3 plastics, including some spray bottles and clamshell packages

#4 plastics, including some squeeze bottles

#5 plastics, including yogurt tubs and some medicine bottles

#7 plastics, including some baby bottles, sippy cups, water bottles and juice containers

All colors of glass bottles & jars (lids removed), aluminum and steel/tin cans (rinse first) and completely empty aerosol containers

Newspapers, magazines, junk mail, flattened cardboard and chipboard soft drink/cereal/cracker boxes (no liners)

Paper cartons (from milk/juice boxes); Tetra Pak cartons (from broth/wine/protein drinks), frozen food boxes with the recycling symbol

Recycling

Plastic bags, aluminum foil or containers, Styrofoam egg cartons, cups or other #6 plastics

Ceramics, drinking glasses and incandescent light bulbs

Pizza boxes and other soiled paper products

Food waste, plastic straws, alkaline batteries, textiles, dead animals under 10 lbs., broken household items, wire hangers

Trash

Bagged grass clippings, leaves and other plant material in biodegradable paper lawn bags.

Unbagged brush trimmings tied with biodegradable twine or rope. Branches may be up to 4 inches in diameter. Bundles may be up to 4 feet long and weigh up to 40 lbs.

Yard Waste

Up to 5 gallons or 50 pounds of labeled cleaning supplies, cooking oil, outdoor chemicals, auto fluids, paint/primer/varnishes, soaps, flammable liquids. Lead acid batteries are accepted.

Household Chemicals

Before you trash it, consider if you can donate it, recycle it elsewhere or compost it at home.

Example: Take plastic shopping bags back to the store for recycling.
